Abstract

This study explores the influence of digital learning tools on student engagement in higher education. Prior research suggests that technology-enhanced instruction can improve participation and motivation. The present paper demonstrates a simplified example of APA 7 formatting including sections, citations, tables, and figures.

Keywords: *Digital Learning, Student Engagement, Technology in Education*

Introduction

The integration of digital tools in education has grown significantly over the past decade. Studies have shown that interactive technologies can enhance learning outcomes and engagement (Anderson, 2019). Additionally, online platforms allow students to participate in collaborative learning environments that were previously unavailable (Johnson & Lee, 2021).

Objectives

The objectives of this study are:

1. To examine how digital tools influence student engagement.
2. To analyze patterns of technology usage among students.
3. To demonstrate APA 7 academic formatting in a sample paper.

Literature Review

Research indicates that technology-enhanced learning environments can increase student participation and improve knowledge retention (Brown, 2018). Furthermore, interactive digital platforms promote collaborative learning and problem-solving (Smith, 2020; Johnson & Lee, 2021).

Methodology

A descriptive research design was adopted. Data were collected from a sample of 100 university students through an online questionnaire. The survey measured frequency of digital tool usage and perceived engagement levels.

Results

Table 1 shows the frequency of digital tool usage among students. Figure 1 presents trend in engagement scores.

Table 1. Frequency of Digital Tool Usage

Tool	Average Weekly Use (Hours)
Learning Management Systems	8
Video Conferencing	6
Online Collaboration Tools	5
Educational Apps	4

Figure 1. Trend in Engagement Scores

Discussion

The findings suggest that students who frequently use digital learning platforms report higher levels of engagement. This supports previous research indicating that technology can facilitate active learning (Smith, 2020).

Conclusion

In conclusion, digital learning tools appear to have a positive impact on student engagement. Future research should explore long-term learning outcomes and the effectiveness of specific technologies.

Key APA In-Text Citation Rules (7th Ed.)

One Author: Use the last name and year: (Lee, 2016) or Lee (2016).

Two Authors: Cite both names every time: (Lee & Richards, 2016).

Three or More Authors: Use the first author's name followed by "et al.": (Lee et al., 2016).

Direct Quotes: You must include the page number (p. or pp.): (Lee, 2016, p. 5).

Types of In-Text Citations

Parenthetical: The author and date appear in parentheses at the end of the sentence.

Example: The data suggests a correlation (Smith, 2021).

Narrative: The author's name is incorporated into the sentence, with the year in parentheses.

Example: Smith (2021) found a strong correlation.
